

Data Flow Diagram

Date	1 July 2026
Team ID	XXXX
Project Name	Credit Card Approval Prediction
Maximum Marks	2 Marks

Data Flow Diagram

Create a Data Flow Diagram (DFD) to show how data moves through your system - between external entities, processes, and data stores. Use the symbol legend below as a guide.

DFD Symbol Legend

Symbol	Name	Description
	External Entity	A person, organization, or system outside the project that sends or receives data (e.g., Applicant, Credit Bureau).
	Process	An activity that transforms incoming data into outgoing data (e.g., Data Preprocessing, Model Prediction).
	Data Store	A place where data is stored for later use (e.g., Applicant Database, Trained Model).
	Data Flow	The movement of data between entities, processes, and data stores, labeled with what data is being passed.

Example

The diagram below illustrates the data flow for the Credit Card Approval Prediction system.
