

Scalability & Future Plan

Date	03 July 2026
Team ID	XXXX
Project Name	Credit Card Approval Prediction
Maximum Marks	1 Mark

Scalability & Future Plan:

This document describes how the Credit Card Approval Prediction System can be enhanced to support more users, improve prediction accuracy, strengthen security, and add advanced features in future releases.

Current System Limitations:

S.No	Limitation	Impact	Priority to Address (High / Medium / Low)
1	Model trained on limited dataset	May reduce prediction accuracy for unseen data	High
2	Local deployment only	Limited accessibility for multiple users	High
3	Uses a single ML model	Performance may vary for different datasets	Medium

Scalability Plan:

S.No	Scalability Aspect	Current State	Proposed Upgrade / Solution
1	User Load	Supports individual users	Deploy on cloud to support multiple concurrent users
2	Data Storage	Dataset stored locally	Use MySQL / Cloud Database for scalable storage
3	Performance	Runs on local machine	Deploy on Render / IBM Cloud for better performance
4	Security	Basic input validation	Add user authentication, HTTPS, and data encryption

Future Roadmap:

Phase	Planned Feature / Enhancement	Target Timeline	Expected Impact
1	Increase training dataset	1 – 2 Months	Improve prediction accuracy
2	Train and compare multiple ML models	2 – 3 Months	Better model performance
3	Cloud deployment	3 – 4 Months	Access from anywhere
4	Real-time application status tracking	4 – 6 Months	Better user experience
5	Explainable AI (approval/rejection reasons)	6+ Months	Improve transparency and user trust
